By the way, there is also a more modern, feature-rich, documented alternative to the default Ftp package for U++ (In the sense that it integrates into U++ better, as it is written in U++).

It also comes with all kinds of examples.

See the "Core" directory for Ftp package:

[https://github.com/ismail-yilmaz/upp-components/tree/master/ Core/FTP](https://github.com/ismail-yilmaz/upp-components/tree/master/Core/FTP)

See the Examples" directory for Ftp examples:

[https://github.com/ismail-yilmaz/upp-components/tree/master/ Examples](https://github.com/ismail-yilmaz/upp-components/tree/master/Examples)

Best regards,
Oblivion
