Subject: TheIde crashes in debug mode when inspecting empty, non-initialized Image

How to reproduce:

I've set the breakpoint on a line after the following code
Image img;

Then I've pressed F5 and started debugging. I've chosen 'Locals' tab at TheIde window bottom. When I've clicked 'img' entry in 'Locals' tab, TheIde crashed.

TheIde version 610-dev. OS Windows XP SP2.
