Lance wrote on Tue, 17 September 2024 17:34 Thank you mirek for all the hard work!

I have a question. In CoWork.h, line 186, etc,

```
void Do(Function&& f, Args&&... args) { co.Do([=]() { ret = f(args...); }); }
```

shouldn't it be something like

```
void Do(Function&& f, Args&&... args) { co.Do([=]() { ret = f(std::forward<Args>(args)...); }); }
```

for perfect forwarding to actually work?
