Hello Dider,

I merged your PR. GraphCtrl is now available from UppHub! However, I just noticed some issues with this package:

GraphCtrl examples do not compile due to fatal error GrapCtrl
"/home/klugier/upp/git/uppsrc/Draw/iml_header.h (17): fatal error:
'GraphCtrl_Demo/GraphCtrl_Demo.iml' file not found" Also when opening GraphCtrl,
TimingPolicies package is missing. Did you forget to create UppHub package for it? Or it is no longer needed? GraphCtrl package shouldn't be main package since it is supportive package. You should remove "GUI SSE2" configuration

I attached screenshots with the problems described in this message to the UppHub PR #35.

Klugier
