two ways, one test ok, other test sorry:

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
struct MyAppWindow : TopWindow {  
    LabelBox lb;  
    EditString es;
```

```
void Lbes() {  
    lb.HSizePos(50,50).VSizePos(50,50).Add(es);  
    lb.SetText("Title");  
    lb.NoWantFocus();  
    es.HSizePos(60, 100).TopPos(100);  
    this->Add(lb);  
}
```

```
MyAppWindow() {  
    //Lbes(); //this way test ok.  
}
```

```
virtual void LeftDouble(Point p, dword keyflags) {  
    Lbes(); //This way test sorry -- es can't edit  
}  
};
```

```
GUI_APP_MAIN  
{  
    MyAppWindow app;  
    app.Run();  
}
```
