Hi,
First of all, sorry if i'm not very polite (English is not my native language)
I'm developing an application with the layout and everything is working great but I have an issue with the TreeCtrl (I'm adding elements to it) and it just truncates the output, I mean, the scrollbar never appears as you can see on the first image.

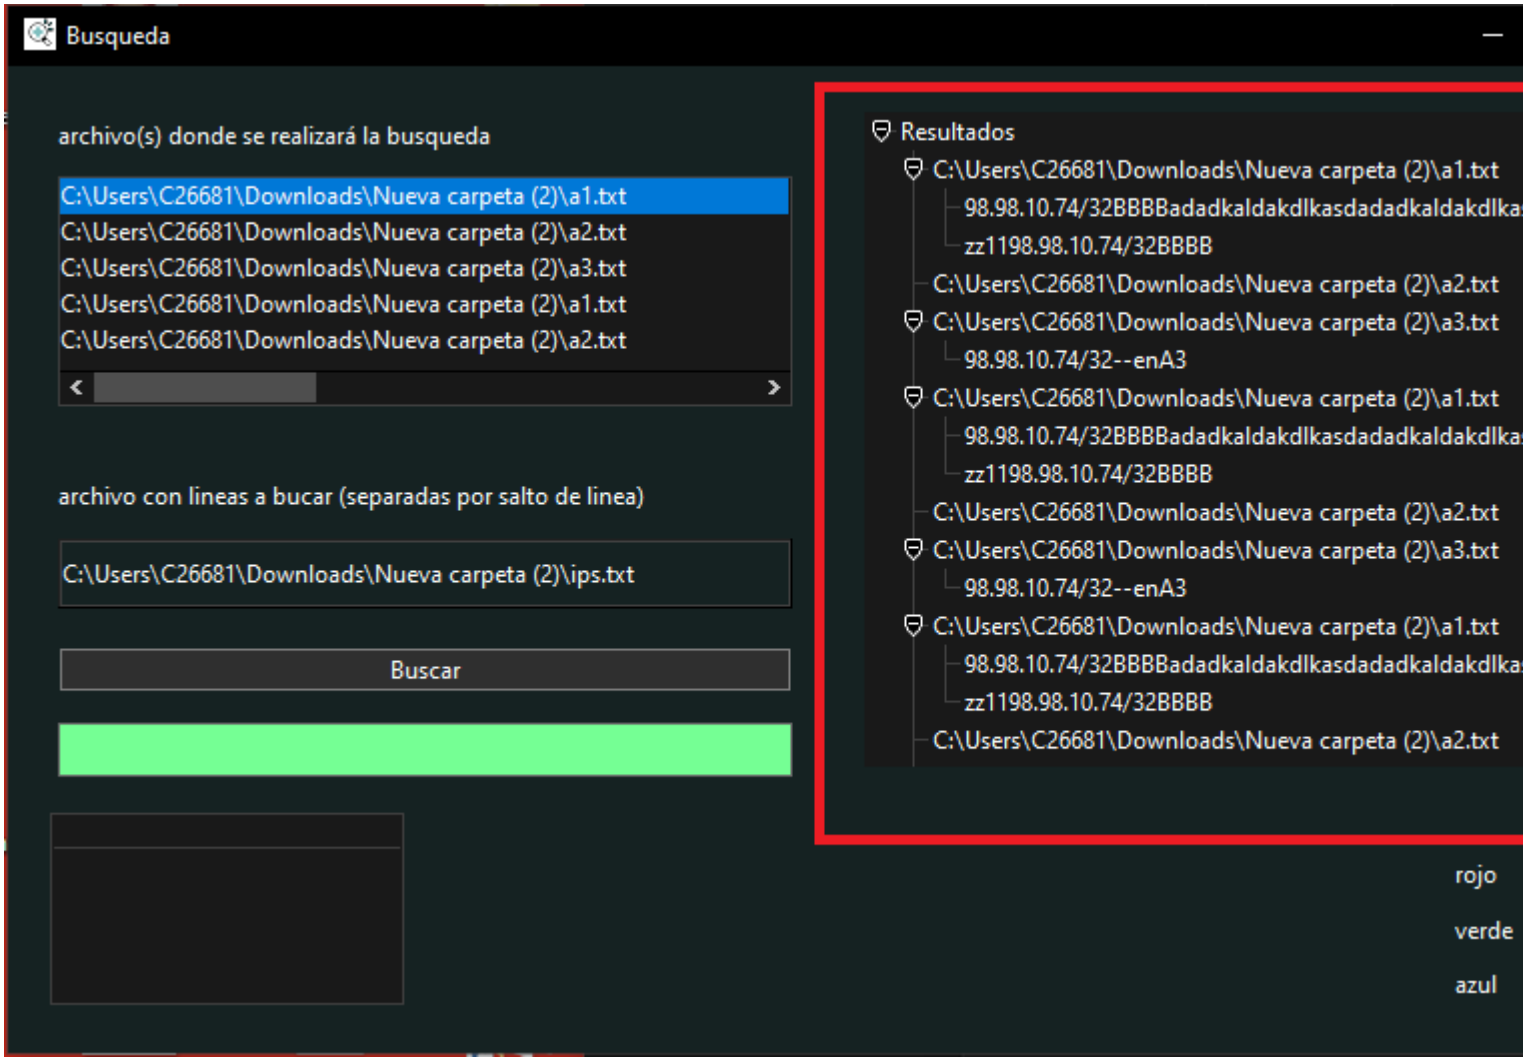

Also there is a strange behavior, after some minutes, if I just let the program running on background and then I go back to it, the scrollbar just appears (as you can see on the second image).

Hi Victor

In my computer (Windows, CLANG) your demo don't run. It crashes here:

```
ProgramaBusqueda::ProgramaBusqueda()
{
 CtrlLayout(*this, "Busqueda");

...
 //leyendo archivo configuracion
 ifstream archivo_config( "config" );            // This file doesn't exist. No error check
 string str_temp;
  //leyendo primera linea (color rojo)      // This indentation is not justified?
```

```
  getline (archivo_config, str_temp);       // The file is read even if it is not opened
  bg_rojo.SetData(stoi(str_temp));          // stoi() throws an exception as str_temp is empty. No
```
catch catches this exception. Program crashes.
It seems you have submitted your full application. Please to help you better upload the simplest test case and be sure it runs.

Sorry, my bad
I forgot to upload this file (the file called "config")
Which has to be in the same directory as the executable generated

Hi Victor

Including the file, the program opens, but it looks like this.
By touching the controls I have managed to get the background colour not to be black, but I can't get the TreeCtrl to load with data.

Please, if you want us to help you, prepare a simple demo that does what it needs to do to demonstrate the problem.
You can't ask the person who is going to help you to work harder giving you the solution, than the time you spend preparing the example case.

You're right
Thanks for your time

I found the problem,
It seems that it just that i was calling to the Refresh() method on the overriden Paint() method, the problem get solved by just comment that line, now the scrollbar appears!
