ArrayCtrl now can disable line - such line cannot be selected:

ArrayCtrl::

```
void    EnableLine(int i, bool e);  
void    DisableLine(int i)          { EnableLine(i, false); }  
bool    IsLineDisabled(int i) const { return array[i].enabled; }
```

This is used for another ArrayCtrl and DropList method, "AddSeparator".
