Hello all

I do not know to paste properly a unicode character in a GridCtrl.

This only happens copying from outside GridCtrl. If I copy the cell from inside it is pasted perfectly.

In the beginning of the program I have:

```
SetLanguage(LNGC_('E','N','U','S', CHARSET_UTF8));
```

Best regards

Hello all

Perhaps the reason of that is due to the function void GridCtrl::Paste(int mode) (GridCtrl.cpp) does not handle the clipboard with unicode functions. For example:

Line 766

Instead of:

```
lines = Upp::Split(ReadClipboardText(), '\n');
```

Would have to be:

```
wlines = Upp::WSplit(ReadClipboardUnicodeText(), '\n'); (WSplit does not exists yet,  
ReadClipboardUnicodeText does exist)
```

What do you think?

Would have to be:

```
wlines = Upp::WSplit(ReadClipboardUnicodeText(), '\n'); (WSplit does not exists yet,  
ReadClipboardUnicodeText does exist)
```

What do you think?

Change this line to:

```
lines = Upp::Split(FromUnicode(ReadClipboardUnicodeText()), '\n');
```
