Subject: QTF to HTML

Hello,

I have prepared several table in qtf document. Now I need the same files in HTML.
The easiest way should be, if I have understood, the Koldo's package UltimateBook. Moreover it seems to work with tpp files while I have regular qtf (are they the same?). So the question is: is it convenient to use UltimateBook to convert from qtf to HTML or does exist some class that performs the translation?

Thanks,
Luigi

Hello Forlano

I do not remember if there is an easier way but you can get the ideas from QtfAsHtml from UppWeb or MakeHtml from UltimateBook.

Tpp are like Qtf but just with an added header .
