New tiny HttpCookie class is intended for storing basic cookie information and to parse the content of Set-Cookie HTTP header.

HTTPHeader now contains map of cookies (filled by "Set-Cookie" header fields).

HttpResponse now has "full" cookies support, including matching of domain and path.

Hi Mirek,

Not sure how close is this related, but something about the cookie broke nightly builds GCC reports:Quote:/build/builddd/upp-4998/uppsrc/Core/Http.cpp: In member function 'Upp::HttpRequest& Upp::HttpRequest::Cookie(const Upp::HttpCookie&)':
/build/builddd/upp-4998/uppsrc/Core/Http.cpp:207:33: error: no match for 'operator<<' in
'Upp::String((* & c.Upp::HttpCookie::id)) << "?"'
