This is my last "completed" project made in U++. Building it really got me aware of the possibilities of U++ and also of the weaknesses and where you need to pay attention.

Hello Crydev,

Looks nice !!

Which feature in Upp did you enjoy the most while developing your project?

Regards

Biobytes

Looks nice !!

Which feature in Upp did you enjoy the most while developing your project?

Regards

Biobytes

Hi Biobytes,

The feature I enjoyed the most is creating a fast and efficient GUI in a not very hard way. I'm not on another project, a memory scanner, in which I'm using the GridCtrl too. A very nice control and very easy to use.

Crydev
