Hello,

Personally, I think that TheDE icon should have bigger resolution. It is very important because current icon presents bad on several desktop environments such as Unity (Ubuntu).

I have found partial solution consisting of changing `Idelmg::Package` to `Idelmg::PackageLarge()` (`ide/ide.cpp` - line 750):

```
default: Icon(Idelmg::PackageLarge());
```

And also (`ide/SelectPkg.cpp` - line 14):

```
Icon(Idelmg::PackageLarge(), Idelmg::PackageLarge());
```

For the other hand, this patch is incomplete because we need three new high resolution icons: `IconDebuggingLarge`, `IconRunningLarge` and `IconBuildingLarge`;

Sincerely,
Klugier

It would be good on this website to have the Icon for sections of the forum that do not have any new posts to just have the outline.

On different screens and lighting conditions it is hard to see the difference.

Hello Mirek,

I scaled other IDE icons (debugging, runing and building) using nearest algorithm. After that, I made little corrections and added them into ide.iml file.

I enclosed patched source files (ide/ide.cpp & ide/ide.iml). Now, TheIDE icons should look nice on Ubuntu and KDE.

Sincerely,
Klugier
