Hi!

I am developing a package that requires PlotCtrl.h. In the Bazar-example I have studied PlotLibExample and PlotCtrlExample and with those ideas I wanted to use <PlotCtrl/PlotCtrl.h>. I find

```
Aditya-> ls ~/U++/upp-x11-src-9360/uppsrc/
AllFor18n/      CtrlLib/      IconDes/      OleDB/      RichEdit/      Turtle/
art/            Docking/      ide/          Oracle/      RichText/      uMakefile
assemblies      Draw/         ide.out*      _out/        ScatterCtrl/    uMakefile.in
BuildAll/        DropGrid/     install.upp   packages     ScatterDraw/    umk/
build_info.h     Esc/          Makefile      packages1    Skylark/        umk.out*
CbGen/           Geom/         Makefile.in   Painter/     Sql/            Updater/
CodeEditor/      GLCtrl/       MSSQL/        PdfDraw/     SqlCommander/   uppconfig.h
Core/            GLDraw/       MySql/        plugin/      SqlCtrl/        upt/
CppBase/         GridCtrl/     numbers.txt   PostgreSQL/  TabBar/         usvn/
cpp_parser_ignore.txt guiplatform.h ODBC/         RasterPlayer/ TextDiffCtrl/   Web/
CtrlCore/        HexView/      Ole/          Report/      $.tpp/          XmlRpc/
Aditya->
Aditya->
```

means PlotCtrl is missing. Even "locate" could not find it in any other directory. Can you kindly advise me how can I proceed if there is any change in this regard?

Thanks
Abhijit

Hi Abhijit,

PlotCtrl is in bazaar directory

Also, beware! It is unmaintained and experimental, I'd highly suggest to use ScatterCtrl instead if possible...

Best regards,
Honza

Thanks. Well, I shall work with ScatterCtrl.
Best Abhijit
