Subject: problem: red underlined names in comments - SOLVED

I may have accidentally typed some key-combination and ended up with red underlining of some names in my comments.
The underlining is distracting and I cannot figure out how to remove it.
Please help - how to I get rid of the underlines?

Hi,

IDE Menu.

Setup->Settings->Editor
Spellcheck comments

Thanks - that fixed it
(now just idly wondering what key-presses activated it?!)
