

U++ - Bug #1665

Remove dependency of using shorts file name in GccBuilder

03/26/2017 09:34 PM - Zbigniew Rebacz

Description			
<p>Currentl, GccBuilder when dealing with .rc file is using short file name for windows. This is problematic, because partitions can not support that feature - and it means that the .rc feature stops working. It only happens when file has got space in the name, so impact is low - and c partition seems to not be affected.</p> <p>More information in discussion on the forum: http://www.ultimatepp.org/forums/index.php?t=msg&#38;goto=47791&#38;#msg_47791</p> <p>I am certain sure that if we manage to deal with that problem we will be able to remove all methods that generates short cuts.</p>
