Hi, you need to add to the application the code responsible for handling of translation file:

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

#define TFILE <TransWithCtrlInTopWnd/my.t> // <----
#include <Core/t.h> // <----

class TransWithCtrlInTopWnd : public TopWindow {
...
```

PS: first click on the button changes lang to english, so you need to click twice to see chinese

Michal
