You could look at this thread

[http://www.ultimatepp.org/forum/index.php?t=msg&goto=8745&#msg\\_8745](http://www.ultimatepp.org/forum/index.php?t=msg&goto=8745&#msg_8745)

It's a bit of an ugly example, but it illustrates how you can achieve it.

These sorts of simple layout managers are very, very easy to make in Upp once you understand how the logical positioning system works. Making a general use package is more difficult, but I've been tempted to make one for a while since people keep asking for it (and I keep finding uses for them myself).
