Something to fix, it should start with current date.

Quote:

Month-Year field in Calendar seems to be "active", but clicking it nothing happens (?).

If it is clicked it selects first day of that month. If it is clicked on stand alone calendar it does the same, but you can see how calendar change (if antoher month is selected).

OK, perhaps it was because the field was empty -> year -32768 -> nothing happened...

Mirek
