gerryw wrote on Thu, 21 June 2007 16:41Hello All,

1. Remove / Resolve dependencies between "theIDE" and the U++ lib build. We need to be able to build the lib for both M\$ and Linux within a fully encapsulated cmake build.

I've tried another approach - MPC (<http://www.ociweb.com/products/mpc>)

It is similar to cmake, but it is not a build system. MPC is a makefile/project-file generator.

You can take a look at the results at

<http://www.ultimatepp.org/forum/index.php?t=msg&th=2097&start=0&>
