Subject: DocEdit bug
Posted by zsolt on Mon, 25 Jun 2007 21:43:44 GMT

After calling NoWantFocus(), the needed behaviour would be to accept focus when clicking in the DocEdit, but to not accept using keyboard navigation (TAB).
Currently, it is unable to accept focus aon mouse clicks, so the control is not editable. Fix:
void DocEdit::LeftDown(Point p, dword flags) {
 //SetWantFocus(); //removed
 SetFocus(); //added

I think, LineEdit has the same problem.
