this code does work, but very ugly

```
String x = MD5Digest("alajos");
String r;
for(int i = 0; i < x.GetCount(); i++) {
    int a = 0;
    char * ptr = (char*)&a;
    *ptr = x[i];
    r << FormatIntHex(a, 2);
}

Cout() << r << '\n';
```
