Quote:

AFAIK, this happens if you compile BLITZ/Release (optimized). As you never should use BLITZ for optimized version (it makes executables longer), I do not see that as real problem... Just switch the BLITZ off.

Mirek

Hi Mirek,

thanks for reply.

yes you are right. Without blitz it compiles right and the size of exe is indeed smaller. Sometimes it is hard to find out the easiest solution

greetings, ren42
