luzr wrote on Sat, 18 February 2006 17:54OOps misinterpreted you. Well, when typing, it would look really nice

That's it! Try it out and see what I mean. This is not a replacement for the popup which comes when the window is closed, but an early clue so the user can avoid errors. By the way it does not only work for min-max ranges. Just try out a DateEdit after this modification: if you enter an invalid date it is displayed with red background.
