johnevans77 wrote on Sun, 22 July 2007 07:25Thanks Mirek

Glad to hear that

I hope that features supported in Windows and Linux should be balance if possible. I know it would be hard.

About Multimedia. If we have no direct multimedia support, then we are using something like SDL. Am i correct?

Well, this is still C++. You can use any C/C++ library you need.
