[View Forum Message](#) <> [Reply to Message](#)

inline bool LessPath(String fa, String fb) { return ComparePath(fa, fb) < 0; }

```
int ComparePath(String fa, String fb) {
    int la = fa.GetLength(), lb = fb.GetLength();
    int r = ComparePath(fa, fb, min(la, lb));
    return r ? r : cmp(la, lb);
}
```

if first path (fa) is shorter (count letters or symbols) than second (fb)

(not tested)
