Subject: CtrlImg::new_doc()

I was looking at the example UWord; trying to get a toolbar working. And came across this code:

```
void UWord::FileBar(Bar& bar)
{
 bar.Add("New", CtrlImg::new_doc(), THISBACK(New))
    .Key(K_CTRL_N)
    .Help("Open new window");
```

What is CtrlImg::new_doc()? I realize its an image but what do I need in order to use the built in images?
