Thanks for taking the time to look at this. Yeah I wasn't so much looking for it to be incorporated into U++ as to be able to configure the IDE to be able to make use of CUDA with a UPP interface. It seems that this must be possible but that I need to learn more about how to do a "custom build"? or some such. Its kind of a side project for me just now but yes, I'm sure that if there was a configuration (or howto) for using CUDA it could well attract new users.

Thanks again,

Nick

p.s. the whole CUDA thing is pretty new so I suspect they will support more platforms as things progress.
