707dev1, winxp
how to add items to a switch? thank you.
i've got a switch in .lay, which can be assigned only one value. i try to add more in my main function with all methods as follows, but never achieved.

```
char s[] = "UDP TCP";
 s[3]='\n';
 comm_type.EnableCase(1);
 comm_type.EnableCase(2);
 comm_type.EnableCase(3);
 comm_type.SetLabel(s);
 comm_type.SetLabel(2, "TCP");
 comm_type.Add(1,"UDP");
 comm_type.Add(2,"TCP");
 comm_type.EnableCase(1);
 comm_type.EnableCase(2);
 comm_type.EnableCase(3);
```
