707dev1, winxp

how to add items to a switch? thank you.

i've got a switch in .lay, which can be assigned only one value. i try to add more in my main function with all methods as follows, but never achieved.

```
char s[] = "UDP TCP";  
s[3]='\n';  
comm_type.EnableCase(1);  
comm_type.EnableCase(2);  
comm_type.EnableCase(3);  
comm_type.SetLabel(s);  
comm_type.SetLabel(2, "TCP");  
comm_type.Add(1,"UDP");  
comm_type.Add(2,"TCP");  
comm_type.EnableCase(1);  
comm_type.EnableCase(2);  
comm_type.EnableCase(3);
```
