Search for the uppsrc directory on disks

(I think you are working from USB stick? the the USB-STICK/Entwicklung/UPP/ contains uppsrc or does you have it installed inside system (/usr/shared/upp ??? I'm not sure))

After you know where your uppsrc is, check the assembly settings (Set main package -> right click in left pane on your assembly with your application -> Edit Assembly -> Package nests should contain the USB-STICK directory *AND* uppsrc path too.
(like "C:\upp\examples;C:\upp\uppsrc")
