luzr wrote on Wed, 08 February 2006 03:42Actually, what I suggest is that DC/BitBlt (and its X11 equivalents) do not support alpha-blending (AFAIK).

However, it is possible that I misundestood what you really need...

What kind of operation do you want to do with BitBlt?

Mirek

Actually, I want to use not only bitblt but I need hDC's for win32 api's, like SetDIBitsToDevice, StretchDIBits, AlphaBlend etc.
