Changelog since 707-dev1:

PostgreSQL: Dialect now renamed to PGSQL, PgSequence now represents PGSQL SEQUENCE object.

PostgreSQL: DUAL_PRIMARY_KEY was not working, added support for binary columns

SqlExp Select statement now has "Get" variant to be used instead of "From" to get "table-less" select, like "select nextval('seq')". In Oracle, Select(NextVal(SEQ)).Get gets translated to "select seq.nextval from DUAL", in PGSQL to "select nextval('SEQ')".

-M theide commandline option generates Makefile

Help Window is no longer a Window, but is now integrated into theide main frame.

"Close all tabs" and "Close non-project tabs" feature of tabs is now implemented

DropList dropfocus mode is now default, added NotNull, fixed refreshing right button after closing popupt list

Fixed memory allocator connected with limit on a total number of virtual memory blocks

Fixed QuickTabs crash related to group change, reduced space between icon and tab name

GridCtrl now supports inserting after/before and duplicating rows

Change in Image interface <http://www.ultimatepp.org/forum/index.php?t=msg&th=2579&start=0>

Added simple static widget DisplayCtrl

Added FileSel preview

Added SqlArray::ReQuery()

Added CPU_Cores() - returns the number of CPU cores in system.

New widget DropGrid <http://www.ultimatepp.org/forum/index.php?t=msg&th=2610&start=0>

Improved build performance
