Standard array is not parsed by Assist

```
//$-
int step[11]={0,1,2,5,10,20,50,100,200,500,1000}; //Whithout parser directives assist don't work
//$+
```

```
struct Foo
{
    void ShowStep(int n);
};
```

```
//test Alt+C/Ctrl+V
void Foo::ShowStep(int n)
{
    Cout()<<"Step["<<n<<"] = "<<step[n]<<"\n";
}
```

```
CONSOLE_APP_MAIN
{
    Cout()<<"Start"\n";
    Foo foo;
    //test autocompletion
    foo.ShowStep(5);
}
```
