Standard array is not parsed by Assist

```
//$-  
int step[11]={0,1,2,5,10,20,50,100,200,500,1000}; //Whithout parser directives assist don't work  
//$+
```

```
struct Foo  
{  
    void ShowStep(int n);  
};
```

```
//test Alt+C/Ctrl+V  
void Foo::ShowStep(int n)  
{  
    Cout()<<"Step["<<n<<"] = "<<step[n]<<"\n";  
}
```

```
CONSOLE_APP_MAIN  
{  
    Cout()<<"Start"<<"\n";  
    Foo foo;  
    //test autocompletion  
    foo.ShowStep(5);  
}
```
