does not work. 708dev1

ezcomm/main.cpp line 225. the \1 does not wrap it. when running, click "clear" in the lower right corner to test this.

```
info.SetLabel(cnt ? "\1this is a long line. hope it works"/*cnt*/ : "");
```

even if i write like below, it does not change a thing,

```
char ss[100];  
ss[0] = 1;  
strcat(ss, "this is a long line. hope it works");  
info.SetLabel(cnt ? ss/*cnt*/ : "");
```
