Subject: SMTP non english error messages

Hello,

While adding smtp support to a project I'm working on, I noticed that the error messages in the smtp.cpp file were not in english. I updated the smtp.cpp file and the web.t file to add internationalization with english as the default and included the origional message (czech I think) as an option. If someone better at translating could verify my translations, I'd appreciate it.

Thanks,
Dave

The smtp translations are at the end of the web.t file.
