Hi again,

sorry to bother you again but I just got round to installing the new version of the GridCtrl and now I get this

C:\upp\uppsrc\GridCtrl\GridCtrl.cpp: In member function `Upp::GridCtrl::ItemRect&
Upp::GridCtrl::AddColumn(Upp::Id, const char*, int, bool)':
C:\upp\uppsrc\GridCtrl\GridCtrl.cpp:1460: error: operands to ?: have different types

as an error when I try to compile. I can see that the error makes sense but I'm just not sure what you are intending there. Any ideas how to fix it?

Nick
