Unfortunately, the template didn't help too much.
(thank you very much for your help, though)
But you are totally right fudadmin. I have to re-formulate my problem:

U++ .dll to be used from non-U++ application, to use non-U++ .dll in U++ application, but what is
complicated is U++ app with U++ .dll

What is your focus?

Mirek

I mean, how to write a U++ app with U++ dll?

regards.
