I've 2 pc both with ubuntu feisty installed.
On the first one, theide works great.
On the second, it don't even start, giving 'segmentation fault' with no other messages, IF RAN AS A NORMAL USER.
Running as ROOT does work.
I don't know where to look for the problem... any suggestion ?

Best Regards

Max

edit : running on GDB shows this :

Program received signal SIGSEGV, Segmentation fault.
[Switching to Thread -1219471664 (LWP 13303)]
0xb78538e5 in XftCharExists () from /usr/lib/libXft.so.2

edit : with the workaround here :

http://www.ultimatepp.org/forum/index.php?t=msg&goto=9594&&srch=segmentation+fault#msg_9594

it does work.

Ciao

Max
