luzr wrote on Fri, 19 January 2007 20:18 Yes, these are elements not chameleonized yet:

- HeaderCtrl
- ProgressBar
- ComboBox
- Menu (complete)
- SliderCtrl

This will be improving gradually (fighting GTK is time consuming issue...)

Mirek

This info is outdated, Header, Progress & Combo are already chameleonized, Menu style.. I think it's just boring, having only item & topitem values for selected items is like having nothing.., they should support the 4 states plus one style for "separators" and a 4 state value for checks also, it also lacks a value for menu background, another for topbar background (so we can be render things like horizontal gradients present in .NET 2.0 & Office 2003), and a "lateral" value rendered on top of menu background (the area where the icons are painted), this should conclude Menu theming, SliderCtrl I don't know ATM..

Regards  
Mauricio
