Changes since 708-dev2b:

MingGW updated from 3.4.2 to 4.2.1
SDL updated from 1.2.7 to 1.2.12
Sqlite updated from 3.3.0 to 3.4.2
PCRE updated from 7.0 to 7.3
added close group to quick tabs popuped menu
"Insert any file" in TheIDE hotkey changed to Ctrl+Shift+O(because of conflict with Italic in T++ editor)
those pesky icon.ico files wrong exports are no more generated from .iml
fixed a problem with unnamed image in .iml causing iml loss
added -gstabs flag for mingw - this is supposed to solve the problem with mingw 4.2 debugging
fixed potential crash in ArrayCtrl::AddColumn
FileSel types change if there is an empty "DefaultExt", extension is now taken from the "file type" droplist, from the first mask.
fixed clipping in Ctrl::GetTopRect
fixed painting LabelBox image at incorrect y-coord (mrjt)
fixed ArrayCtrl::NoBackground (mrjt)
fixed segmentation fault on Ubuntu Feisty (mdelfede)

PS: There can be a problem with mingw + new sqlite3 in GUI apps. At least on win32 (and on my machine) such apps don't run - investigation in progress...
