3. Fullscreen windows (under Windows) get a border and a title bar if the window loses focus.

This is found to be a bug; now fixed.

Quick fix:

```
void TopWindow::SyncCaption()
{
    LLOG("SyncCaption");
    if(fullscreen) // ADD
        return; // THIS :)
    HWND hwnd = GetHWND();
    if(hwnd) {
        style = ::GetWindowLong(hwnd, GWL_STYLE);
        exstyle = ::GetWindowLong(hwnd, GWL_EXSTYLE);
    }
}
```
