This is found to be a bug; now fixed.

Thanks. It worked. Glad I could help at least in this minor way. What do you think about the strange tooltips I mentioned in my last post?

Sorry missed it.

ToolButtons show its accelerator in the tip by default. I think this is related.

By the way, how does bug-fixing work? I fixed it in my source-tree, but will others have to wait for next release or are the bugs fixed retroactively?

It will be in next dev release. At that point, you are supposed to simply replace the whole uppsrc with the new one...

Mirek
