cbpporter wrote on Wed, 19 September 2007 05:07On the other hand ToolButton doesn't refresh if I call Check(false) after it has been set to true if it is not inserted into a ToolBar. I get the distinct feeling that ToolButton was no intended to be used on it's own.

Your distinct feeling is correct

Quote:

And AFAIK there is no GetCheck or other method to verify if it is checked or not. ButtonOption has such capabilities.

Yes. ToolButton is specifically dedicated to be used with ToolBar and there you never access the button instance.
