zsolt wrote on Wed, 19 September 2007 21:42: Check AddressBookXML2 example app. I did. I guess I have to do more in depth debugging of why it doesn't work.

On the other hand, I changed a method in ToolButton and the control now refreshes itself when Check status is updated. A further optimisation could be to check if it's parent is a ToolBar, and don't refresh in that case.

```
Bar::Item& ToolButton::Check(bool check)
```

```
{  
  if (checked != check)  
  {  
    checked = check;  
    Refresh();  
  }  
  return *this;  
}
```
