fonso21 wrote on Fri, 21 September 2007 14:26 Persian (Farsi) is an arabic language type.  
Therefore RTL.

You can find a very good and detailed description in

<http://behdad.org/download/Publications/persiancomputing/a007.pdf>

There are several pages with detailed description of the problem.

fonso

Interesting. 4 years we have not been impacted by RTL, now we have two RTL demands in 2 weeks

OK, I guess we have some work to do now

But do not expect this for 2007.2 release. Will take a lot of work to happen...
