Mindtraveller wrote on Sat, 29 September 2007 22:00It`s some kind of simple question which must have simple answer.
I`m adding layout with non-english label names. I start application, and these symbols aren`t displayed.

How to resolve it?

OS: WinXP SP2 Russian
U++: 708-dev1

Make sure the codepage of .lay matches the codepage of application.

Codepage of application is defined by SetDefaultCharset in MAIN.
