Subject: Re: Optimization Mystery...
Posted by mr_ped on Sun, 30 Sep 2007 10:16:20 GMT

Any chance to try some linux distro too and look if there's anything to optimize?
(but I think the KDE or GTK will be too slow on such machine, maybe some lightweight X would make more sense. Than again making sure UPP is fast under GTK and KDE is more important, as those two are major players right now).
