mr\_ped wrote on Sun, 30 September 2007 20:15: I think it's easier (in amount of work) to omit them from .upp file.

Especially if the lib files are final and you are not going to touch them anytime soon.

Well, too late, that's already done

BTW, I prefer to see the files inside the IDE than to have included files 'hidden'. I just added an 'N' to the extensions of non compilable files AND inside all #include referring to them.

As my app was already patching #includes, that was not too hard job.

Thanx for your help !

Max
