Hello,

I'm using the following code to color the background of a cell

```
marray.Set( r, c, AttrText(txt).Paper(Color(150, 150, 150)));
```

I would like to know if this operation modify the content of the cell with respect the following code

```
marray.Set( r, c, txt);
```

From what I'm observing it seems that the content of the cell is not exactly the same. Maybe some invisible character is added by AttrText() that it is passed to display to paint the cell?

Thanks,  
Luigi
